

2026 Invitational Reflection

Things that went well:

- Schedule (having everyone proctoring at certain times)
- Pizza for volunteers
- Kahoot
- Awards ceremony (stalling for time is doable. Have the presentation done ahead of time except for)
- Getting volunteers from $\Lambda\Phi\Omega$
- Difficulty is good

Things that could be improved:

- More info to the team earlier
- Map printing
- Say that we are not providing pencils
- Team numbers
- Finish tests sooner
 - Print build sheets
 - Some tests need to be in color
- Info desk - need someone to answer questions at all times for volunteers/students/parents
- Check build event materials ahead of time
- Grading overall was good (need a better system for double checking and inputting to sheet)

We NEED more club members!!! Target the sophomores and scioly alum. maybe the daily digest.

We could collaborate with other clubs. Open to suggestions.
